

I believe that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Before the current law we would receive approx 10 telemarketing calls per week. Under the current law, we rarely receive any unwanted calls. Under the privacy law my family can have an enjoyable eveing at home with out being interupted during the dinner hour by unwanted calls. I belive this law should be kept in place as it currently stands. Thank you for your time
